

Author Instructions – AIP Conference Proceedings

7 x 10 inch, single column format

Check List

- ☐ Is your paper the proper length (8 pages contributed; 10 pages invited, 20 pages plenary)? **NOTE:** Extra page fees are US \$150 per page. These must be paid in the publications room at the conference site **no later than Wednesday, June 15, 2011, 5:00 pm.**
- ☐ Are the printed areas the correct size (156 mm [6 1/8"] wide, 248 mm [9 3/4"] long, with the first page only 210 mm [8.25"] long)?
- ☐ Are you using the correct format (see sample paper)?
- ☐ Have you double checked your numbering of all figures, tables, equations, and references?
- ☐ Did you **embed** all fonts when saving your file?
- ☐ Have you supplied the Managing Editor with the signed Transfer of Copyright form? **NOTE:** These must be submitted to the publications room at the conference site **no later than 5:00 pm on Thursday, June 16, 2011. Your paper can not be published without a signed Transfer of Copyright form.**
- ☐ Were permissions granted by other publishers or authors if required and the necessary documentation given to the Managing Editor (**submit form(s) and/or documents to Managing Editor no later than 5:00 pm on Thursday, June 16, 2011**)? Please see page 2 and 3 for additional information.
- ☐ Have you updated/completed all of your contact information on the AIP PXP site (*address to be provided at a later date*)?
- ☐ Did you check the appearance of your paper on AIP PXP after submitting it? Occasionally the translation to PDF changes the layout of a Word document. You must approve the file for the submission to be completed. (*This applies once the submission site is available.*)

General Information

The Proceedings of the *2011 Cryogenic Engineering Conference (CEC) and International Cryogenic Materials Conference (ICMC)* will be published as a special volume by the American Institute of Physics (AIP). The Editors are J. G. Weisend II (CEC) and U. (Balu) Balachandran (ICMC).

Please note that all accepted papers from the AIP publication of *Advances in Cryogenic Engineering* are sent to ISI for inclusion in the ISI Proceedings citation database.

The publication process for the *CEC/ICMC 2011* is all electronic. All articles for the Conference Proceedings will be submitted and reviewed electronically. Once accepted, AIP will publish your paper as received – this is different from journal publications. **AIP does not copyedit or typeset your paper.** Therefore it is imperative that you adhere to all formatting requirements and double check and proofread your paper carefully before submitting it at the special web submission site.

A Microsoft Word sample paper (USA style or A4 style) and LaTeX style guide (.zip file) for the 7 x 10 inch, single column format are available at <http://www.cec-icmc.org>.

If you have questions regarding page layout, color artwork, permissions, or copyright, you may contact the Managing Editor, Annett D'Antonio, directly at:

Centennial Conferences ♦ 917 Front Street, Suite 220 ♦ Louisville, CO 80027 ♦ USA
E-mail: cecicmc@centennialconferences.com ♦ Phone: (001) 303-499-2299 ♦ Fax: (001) 303-499-2599

Following publication of the printed proceedings, all papers will be made available online in open access to all.

Manuscript Preparation

- Length of your paper: Contributed submissions (regardless of whether they are oral or poster presentations) will be allocated 8 (eight) pages. Invited contributions will be allocated up to 10 (ten) pages. Plenary contributions will be allocated up to 20 (twenty) pages.
- Margins: Please see page 1 and 2 of the sample paper for complete information.
- Figures: provide black-and-white figures if they should be printed in black-and-white. Some color figures can be printed in black-and-white, but generally only with some loss of information. Check your figure legends carefully and remove any mentioning of color if the figure is to be printed in black-and-white. All color figures will be printed in black-and-white unless you make arrangements with the lead volume editor for color printing. If you accept the color page charge, AIP will need a letter or email from you, including complete contact information to where the invoice should be sent, title of your paper, figure numbers to print in color, and statement accepting the additional charges. If required by your institute, AIP will need a purchase order number as well.
- Figures and tables must be inserted in the text (as close as possible to their first mention in the text but at the top or bottom of the page) and may not follow the Reference section. However, it is acceptable to have a large figure or table occupy the bottom half of the last page.
- Please supply keywords for your article as indicated in the sample papers.

Keywords should describe the main topics of the research reported in the article, with 3-8 keywords typically being sufficient. Very general terms are not necessary (e.g., "physics", "astronomy", or "cryogenic"); keywords should instead describe specific topics and thus help someone searching for articles in these subject areas.

If you would like to see the keywords used for any paper published in the **2007 Advances in Cryogenic Engineering**, you may log on to:

CEC: <http://scitation.aip.org/dbt/dbt.jsp?KEY=APCPCS&Volume=985&Issue=1> or

ICMC: <http://scitation.aip.org/dbt/dbt.jsp?KEY=APCPCS&Volume=986&Issue=1>,
click on any abstract link, and you will see the used Keywords to the right of the abstract.

If you would like to see the keywords used for any paper published in the **2009 Advances in Cryogenic Engineering**, you may log on to:

CEC: <http://scitation.aip.org/dbt/dbt.jsp?KEY=APCPCS&Volume=1218&Issue=1> or

ICMC: <http://scitation.aip.org/dbt/dbt.jsp?KEY=APCPCS&Volume=1219&Issue=1>,
click on any abstract link, and you will see the used Keywords to the right of the abstract.

- Follow the Microsoft Word sample paper (USA style or A4 style) or use the LaTeX style guide provided. **Make sure to embed all fonts when saving your file.**

Forms

1. In addition to uploading the paper, you must submit a signed **Transfer of Copyright** form. The form can be mailed or emailed (scanned PDF version) to the Managing Editor, Annett D'Antonio (see page 1 for complete contact information) or must be submitted to the publications room at the conference site no later than 5:00 pm on Thursday, June 16, 2011. **Your paper can not be published without a signed Transfer of Copyright form.**
- Complete the **Offprint Order Form** if you wish to order offprints of your paper, and submit during the Conference or send it to Annett D'Antonio as well.

Permissions

- Permissions: The Proceedings publisher must of necessity assume that material submitted for publication is properly available for dissemination to the public. It is the responsibility of the author, not the Conference or the Proceedings publisher, to determine whether disclosure of the material requires prior consent of other parties, and, if so, to obtain it.
- To use previously published material from a book or journal, you must obtain written permission from the owner of the rights to the material (the original publisher and/or author). **It is your responsibility** to obtain permission to use copyrighted material. The executed permissions need to be sent to the Managing Editor, Annett D'Antonio.

Write for permission as early as possible before your manuscript deadline. Publishers may be slow in responding to requests for permission, and it is possible that permission will be denied, or that you will be asked to also obtain the author's permission (in cases where the author controls sole rights, or joint rights with the publisher). In any case, it is in your own best interest to also ask the author of the original publication. If the author is difficult to locate, keep good records of your attempt.

Most publishers offer submission of permission requests online or via email, which may be the fastest and most convenient way of receiving a reply. Some examples with relevant links are:

Elsevier: <http://www.elsevier.com/locate/permissions>

Nature: http://nature.custhelp.com/app/answers/detail/a_id/109/kw/permission/related/1

Springer : <http://www.springer.com/rights?SGWID=0-122-0-0-0>

Science: <http://www.sciencemag.org/site/help/about/permissions.xhtml>

Astronomy & Astrophysics: no information in publisher's website

The Astronomical Journal: <http://www.jstor.org/page/journal/publastrsocioipaci/rights.html>

the Astrophysical Journal: <http://www.jstor.org/page/journal/publastrsocioipaci/rights.html>

You may also use the **Permission Request Form** to request permission to reprint text, tables or figures. You may complete this form and fax it to the publisher or author of the material you wish to use.

When the signed permission is returned to you, **please insert any necessary credit lines** in your figure or table legends.

You *do* need permission to:

1. Quote verse, either in whole or in part.
2. Reproduce tables, graphs, drawings, and photos, or any copyrighted features that are complete in themselves. *This is true even if it is “your own work” already published elsewhere.*

NOTE: The mere *redrawing of an illustration is not enough to make it original*. There must be alterations that are themselves copyrightable. Even when intellectual additions are present, you must obtain permission from the copyright holder to alter the table or illustration.

NOTE: *Acknowledgment* of the source of material does not substitute for *obtained permission* to use the material. Always obtain permission when in doubt.

NOTE: It is a courtesy and it is in your best interest to *notify the original author* of your intention to reproduce his/her material. Many publishers actually require it.

You *do not* need permission to:

1. Use material from any AIP journal or magazine and also from select publications of constituent societies of AIP for which AIP administers permissions (please see the list of publications exempt from need of permission).
2. Use material in the public domain (material that is no longer or never has been protected by copyright, e.g. United States government reports, NASA publications, DOE publications). Note that a work which has passed into the public domain in the United States may still be protected under copyright in other countries. If so, you must obtain permission to use such material in order to enable AIP's worldwide distribution of your work.
3. Include material that falls within the Freedom of Information Act. This would include work done by a U.S. government employee and work published by the U.S. government.
4. Discuss another's *ideas* as long as that person's "literary expression" of the ideas is not used; you must keep in mind that the organization and selection of the material and its sequence are part of the "literary expression." When in doubt, obtain permission.
5. Include material when the use constitutes "fair use," such as quoting or paraphrasing copyrighted material for the purpose of scholarly comment, illustration, or criticism within a limited scope.

AIP AND MEMBER SOCIETIES' JOURNALS WHICH DO NOT REQUIRE PERMISSION REQUESTS

American Institute of Physics

- *Applied Physics Letters
- *CHAOS
- *Computers in Physics
- *The Industrial Physicist
- *JETP Letters
- *Journal of Applied Physics
- *The Journal of Chemical Physics
- *Journal of Experimental and Theoretical Physics
- *Journal of Mathematical Physics
- *Journal of Physical and Chemical Reference Data
