

Michael DiPirro

Mike DiPirro received a Ph.D. in Low Temperature Physics from the State University of New York at Buffalo in 1979. After a one year NRC Fellowship at the National Bureau of Standards (now NIST) in Gaithersburg, Maryland, he joined the newly-formed Cryogenic Branch at NASA's Goddard Space Flight Center in 1980, where he has worked until the present. He has written more than 80 refereed journal articles in low temperature physics and cryogenic technology. Mike has attended every CEC since 1985 and has served as session chair and/or co-chair in almost all of them. He is one of the Technical Editors of the Advances in Cryogenic Engineering, and has served in this role since 1999. Mike is committed to continuing face-to-face meetings and conferences as the most efficient way to communicate and advance technology.
