

Eric Grald

Eric Grald is the Business Development Manager at Creare LLC, where he also serves as an R&D project engineer. Eric began his career at the Honeywell Technology Strategy Center as a mechanical engineer developing transient thermal models to predict building energy usage. He then moved to the computational fluid dynamics software company, Fluent Inc. (later acquired by ANSYS), and held positions of growing responsibility in consulting services, technical support and product management. Since joining Creare in 2015, Eric has focused on growing their engineering consulting business in the industrial (non-government) sector. He serves as project manager and technical contributor in the cryogenic systems, turbomachinery and power generation fields. Eric has successfully led programs to develop a new drive system for a GM cooler, cryocooler control electronics, and cryogenic test chambers for various applications.

Eric has a bachelor's degree from MIT and a master's degree from the University of Minnesota, both in mechanical engineering.
